Dear Mr. Spangenberg:

SUBJECT: CLINTON POWER STATION, UNIT 1 - INSERVICE INSPECTION
(ISI)/INSERVICE TESTING (IST) RELIEF REQUESTS
(TAC NO. M73357)

By letter dated July 29, 1988, you requested relief from certain ASME Section XI requirements as described in Relief Request Nos. 4001 (Revision 1) and 4003 (Revision 1), and new Relief Request No. 4004. By letter dated December 28, 1988 you submitted a revised Relief Request No. 4004.

The staff has reviewed your submittals and has concluded that relief can remain granted for Relief No. 4001 (Revision 1), pursuant to 10 CFR 50.55a(g)(6)(i), and the alternative examinations remain approved for Relief Request No. 4003 (Revision 1), pursuant to 10 CFR 50.55a(a)(3)(i), based on previous safety evaluations. The staff has concluded that relief is not required for associated component supports added to Relief Request No. 4001 (Revision 1). The staff has also concluded that relief can be granted for Relief No. 4004, pursuant to 10 CFR 50.55a(g)(6)(i). We have determined that granting of this relief is authorized by law and will not endanger life or property or the common defense and security and is otherwise in the public interest, giving due consideration to the burden upon the licensee that could result if the code requirements were imposed on this facility.

Sincerely,
