

25 JAN 1985

MEMORANDUM FOR: James R. Miller, Chief  
ORB-3, NRR

FROM: Eric H. Johnson, Chief  
RPB-1, RIV

SUBJECT: REQUEST FOR PUBLICATION IN MONTHLY FR NOTICE - NOTICE  
OF CONSIDERATION OF ISSUANCE OF AMENDMENT TO FACILITY  
OPERATING LICENSE AND PROPOSED NO SIGNIFICANT HAZARDS  
CONSIDERATION DETERMINATION AND OPPORTUNITY FOR A HEARING

Public Service Co. of Colorado, Docket No. 50-267, Fort St. Vrain Nuclear  
Generating Station, Platteville, Colorado

Date of amendment request: December 31, 1984

Description of amendment request: The proposed change to the Technical  
Specifications provides clarification that only gamma radioactivity is  
monitored by the installed activity monitors. This clarification consists  
of inserting the word "gamma" prior to the words "activity monitors" in  
Specifications ELCO 8.1.2, ELCO 8.1.3, and ESR 8.1.2.

Basis for proposed no significant hazards consideration determination:

The Commission has provided guidance concerning the application of these  
standards by providing certain examples (48 FR 14870). The examples of  
actions that are considered not likely to involve significant hazards  
considerations include a purely administrative change to Technical  
Specifications: for example, a change to achieve consistency throughout  
the Technical Specifications, a correction of an error, or a change in  
nomenclature.

The proposed changes to the Technical Specifications will not alter the equipment being used nor the operation of that equipment, and only serves to clarify the requirement for continuously monitoring the radioactivity of liquid effluent releases. Since the actual operations will not be affected by this change, the staff proposes to determine that this action is an administrative change as discussed above and, therefore, we propose to determine that this action involves no significant hazards considerations.

Local Public Document Room location: Greeley Public Library, City Complex Building, Greeley, Colorado.
