ABSTRACT (Limit to 1400 spaces, i.e., approximately fifteen single-space typewritten lines) (16)

ABSTRACT

On January 17, 1985 it was discovered that the communication links between North Anna and the NRC were functionally tested on a three month frequency instead of a monthly frequency. The three month frequency was established as part of North Anna's approved Emergency Plan pursuant to NUREG-0654. However, in addition to this guidance, North Anna is also committed to 10CFR50 Appendix E which requires a monthly functional test of the communication links. This event is reportable pursuant to the North Anna Unit 2 license, Section 2(H).

The phones were tested satisfactorily and the surveillance interval has been changed to reflect the monthly testing requirement.
