JUL 17 1992

Docket No. 50-293

Mr. Roy A. Anderson
Senior Vice President-Nuclear
Pilgrim Nuclear Power Station
Boston Edison Company
RFD #1 Rocky Hill Road
Plymouth, Massachusetts 02360

Dear Mr. Anderson:

SUBJECT: EROSION/CORROSION MONITORING PROGRAM INSPECTION AT
PILGRIM NUCLEAR POWER STATION - NRC REGION I INSPECTION
REPORT NO. 50-293/92-12

This letter refers to the inspection intended to promote public health and safety conducted by Messers P. Patnaik and R. McBrearty of this office from June 8 to June 12, 1992, at the Pilgrim Nuclear Power Station in Plymouth, Massachusetts. Messers. Patnaik and McBrearty discussed the findings with the members of your staff on June 12, 1992, at the conclusion of the inspection.

This inspection centered around activities relative to the long-term erosion/corrosion monitoring program as accomplished in accordance with NRC requirements. Generic Letter 89-08, licensee commitments and procedures. The mitigation of erosion/corrosion in high energy piping is important to maintain pressure boundary component integrity.

The inspection consisted of reviews of analyses, selective examination of procedures and representative records, interviews with personnel and observations by inspectors. The erosion/corrosion program and its implementation was determined to be very good and effective.

Sincerely,

Clifford J. Anderson, Acting Chief
Engineering Branch
Division of Reactor Safety
