Docket No. 50-285

Mr. W. Gary Gates
Division Manager - Nuclear Operations
Omaha Public Power District
444 South 16th Street Mall
Mail Stop 8E/EP4
Omaha, Nebraska 68102-2247

Dear Mr. Gates:

SUBJECT: RISK-BASED INSPECTION GUIDE

This letter is in reference to the development of a Risk-based Inspection Guide (RIG) to be published as a NUREG under the USNRC Technical Assistant Program with National Laboratories. The RIG is intended to provide useful guidance for USNRC inspection activities.

The purpose of this letter is to inform you that we are planning to send our contractor, Tom Vehec of Pacific Northwest Laboratory (PNL), to visit your plant, Fort Calhoun, on August 4, 1992. The visiting contractor will accompany the resident inspector in a system walkdown and verify the accuracy of PNL's information. During this visit, the contractor will be available to meet your staff and receive comments from you regarding the RIG in order to accurately reflect your plant status. However, we would like to clarify that your participation during the visit will be strictly voluntary. We are enclosing a draft copy of the RIG, and if you choose to participate during the visit, please inform me and the RIG project coordinator, Dr. Jin Chung (301-504-1071).

Your cooperation with us in this matter is appreciated.

Sincerely,

Original signed by John T. Larkins for:
