ATTN: Mr. Donald Shelton  
Vice President  
Nuclear-Davis Besse  
Centerior Service Company  
c/o Toledo Edison Company  
300 Madison Avenue  
Toledo, OH 43652

Dear Mr. Shelton:

This refers to the inspection conducted by Messrs. R. Paul and N. Shah of this office on June 15-19, 1992. The inspection included a review of authorized activities for your Davis Besse Nuclear Power Station Unit 1 facility. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

Certain other activities, set forth in the enclosure to this letter, appear to be a deviation from commitments made in a June 1986 10 CFR 50.59 safety evaluation review for the low level radwaste storage facility. The inspection showed that corrective actions had been initiated to correct the identified deviation and to prevent recurrence. Consequently, no reply is required.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC Public Document Room.
