Note to Jan Norris

SUBJECT: BRUNSWICK 1 CONTAINMENT LEAK TESTING SURVEILLANCE (OELD # 838 404)

The package isn't bad but the example you use is incorrect. The example
in the Shölly rule applies to a situation where the Regulation has changed
and you make minor modifications of the license to conform with the change
in the Regulations. This does not appear to be that case. The Regu-
lations hasn't changed as far as I can tell from this package - it doesn't
result from any change in the Regulations that I can see. If there is in
fact a change in the Regulations which causes this amendment then you have
to do more describing of what that change is. If not, choose another
example or do an analysis of the three criteria.
