Note to Dick Clark

SUBJECT: BROWNS FERRY 1 - MODIFICATION OF LANGUAGE IN TECH SPEC
(OELD # 838 708)

Note the suggestions for modifying some of the language marked up on the package, particularly the language relating to valving things out and valving them in. In addition to that, change one goes on at some length to indicate what the licensee said - bottom half of page 4. I don't see that we indicated whether we agreed or disagreed with the licensee and in the absence of that, I don't see any other basis for our conclusion that its okay, so you have to add some staff conclusion with respect to change number one.
