Note to M. Thadani

SUBJECT: DUANE ARNOLD - INTERIM INSPECTION PROGRAM (OELD # 841 666)

The package looks alright as far as it goes but its very hard to understand exactly what the function of this amendment is. Would you please return the packge with a copy of the existing technical specifications so that I can see what the change in technical specification actually is and what it actually appears to accomplish. I just can't understand it from the applicant's incoming.

Please return the package with the existing tech specs, directed to me.
