Note to D. DiIanni

SUBJECT: PRAIRIE ISLAND 1 HYDROGEN RECOMBINERS/K(Z) CURVES/SNUBBERS ...
(OELD # 838 625)

We have added a number of changes which will substantially improve the clarity of the package; however, there is one change (change #8) that I don't agree is an administrative change, not from the way you've describe it. It looks like a change in the frequency of an examination and that is not an administrative change. Describe why its okay but I don't agree
