

ENCLOSURE

MEETING SUMMARY

Licensee: Florida Power and Light

Facility: St. Lucie Units 1 and 2

Docket Nos.: 50-335 and 50-389

Facility License Nos.: DPR-67 and NPF-16

A meeting was held in the NRC Region II Office on January 22, 1985, to discuss the implementation of 10 CFR 50 Appendix R, Fire Protection, in preparation for the special inspection at St. Lucie Units 1 and 2 scheduled for February 25 through March 1, 1985.

The licensee presented copies of the following draft preaudit information requested by the Region II staff:

1. Piping and instrumentation (flow) diagrams for hot standby (shutdown) and cold shutdown systems, and alternative or dedicated shutdown.
2. Plant layout and equipment location drawings which identify the physical plant locations of hot standby (shutdown) and cold shutdown equipment.
3. Plant layout drawings which identify fire area delineation and fire protection equipment locations.
4. Marked-up layout drawings which identify the locations of emergency lighting units.
5. Associated circuit analysis methodology.
6. Plant operating procedures which describe emergency hot and cold shutdown from emergency control stations outside and independent of the control room, and shutdown operations which utilize alternative or dedicated shutdown capability. An outline of plant operating procedures which describes normal hot and cold shutdown from inside the control room.
7. St. Lucie Units 1 and 2 Nuclear Fire Protection Program manual which provides details concerning NRC/licensee correspondence on fire protection, exemption requests, and cable routings for Safe Shutdown Systems.
