GLEN ELLYN, ILLINOIS 60137

June 8, 1979

Docket Nos. 50-483/486

MEMORANDUM FOR: Region III Files: Callaway

THRU: G. Fiorelli, Chief, Reactor Construction and
Engineering Support Branch

FROM: R. C. Knop, Chief, Reactor Projects Section 1

SUBJECT: CALLAWAY COOLING TOWER CONCRETE

On May 1, 1979 I along with Jim Foster, attempted to contact [redacted] or [redacted]. We were unsuccessful. I then called the Callaway site asking about any labor problems associated with site work. The licensee acknowledged that there was a labor dispute on th the non-safety related towers and the dispute did not involve any work going on inside the site fence. Subsequently, Mr. Foster was successful in contacting both [redacted] and [redacted] (See his memo dated May 23, 1979) The allegers collaborated that the work was not safety related and did not involve the same contractors as working on safety related equipment at Callaway. On May 2, 1979, I contacted the licensee and informed them of the substance of the allegation (leaving out identity of the allegers), with the thought that they should review the allegation and determine if a safety problem existed. Subsequently, Mr. Hansen confirmed that the licensee was reviewing the matter.

R. C. Knop, Chief
Reactor Projects Section 1
