Gulf States Utilities
ATTN: William J. Cahill, Jr.
Senior Vice President
River Bend Nuclear Group
P. O. Box 2951
Beaumont, Texas 77704

Gentlemen:

This refers to the inspection conducted by Messrs. W. R. Bennett and C. C. Harbuck of this office during the period January 28-February 1, 1985, of activities authorized by NRC Construction Permit CPPR-145 for River Bend Station, and to the discussion of our findings with you and other members of your staff at the conclusion of the inspection.

The area examined during the inspection was the integrated emergency core cooling system and loss of offsite power preoperational test. Within this area, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors. These findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

We have also examined actions you have taken with regard to previously identified inspection findings. The status of these items is identified in paragraph 2 of the enclosed report.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Original Signed By
E. H. Johnson

E. H. Johnson, Chief
Reactor Project Branch 1
