

ENCLOSURE 1

NOTICE OF VIOLATION

Mississippi Power and Light Company
Grand Gulf

Docket No. 50-416
License No. NPF-29

The following violation was identified during an inspection conducted on November 13-16, 1984. The Severity Level was assigned in accordance with the NRC Enforcement Policy (10 CFR Part 2, Appendix C).

Technical Specification Sections 6.8.1.a and 6.8.1.f require written procedures to be established, implemented, and maintained covering the applicable procedures in Appendix A of Regulatory Guide 1.33 and Fire Protection Program implementation. Regulatory Guide 1.33, Appendix A requires procedures for the radiation protection program and the plant fire protection program.

- a. Grand Gulf Procedure OI-S-08-04, Radiological Respiratory Protection Program, Section 6.3 stipulates that to properly utilize respiratory protection equipment, individuals shall be trained and fitted to ensure that the user will be afforded the proper respiratory protection. Personnel are to have a physical examination prior to respiratory training and fitting followed by a subsequent annual (+30 days) medical review. Personnel are to be trained in the proper use of respiratory equipment and are to be initially fit tested on the type of respiratory equipment to be used with proper fit to be redetermined every two years (+30 days).

Contrary to the above, a large number of operations personnel who are also assigned to the plant fire brigade are not respiratory qualified due to the lack of required training, fit test, or medical review.

- b. Grand Gulf Procedure OI-S-04-12, Fire Protection Training Program, Sections 6.3, 6.6, and 6.8 requires all fire brigade members to be retrained on an annual basis in basic fire protection and site specific training; regular planned meetings to be held at least every three months for all brigade members to review changes in the fire protection program and other subjects as necessary; and, all brigade members to have an annual physical examination to determine their ability to perform strenuous fire fighting activities.

Contrary to the above, several fire brigade members had not received the specified annual and quarterly training or had not received a physical examination within the past 12 months to determine their ability to perform strenuous fire fighting activities.

This is a Severity Level IV violation (Supplement I).
