Wichita, Kansas 67201

Gentlemen:

This refers to the inspection conducted by Messrs. W. G. Guldemon and H. F. Bundy of this office during the period January 1 to 14, 1985, of activities authorized by NRC Construction Permit No. CPPR 147 for the Wolf Creek Generating Station, and to the discussion of our findings with Mr. C. C. Mason and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included 10 CFR 50.55(e) reports, IE Bulletins and Circulars, independent inspection, preoperational test activities, procedure reviews, TMI task action plan items, and preoperational test deficiency deferrals. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspectors. The findings of this inspection are documented in the enclosed report.

Within the scope of the inspection, no violations or deviations were identified. Two open items were identified in paragraphs 2 and 5 of the enclosed report.

We have also examined actions you have taken with regard to previously identified inspection findings. The status of these items is identified in paragraph 2 of the enclosed report.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

Original Signed By:  
E. H. Johnson

R. P. Denise, Director  
Wolf Creek Task Force
