

KANSAS GAS AND ELECTRIC COMPANY

GLENN L. KOESTER
VICE PRESIDENT - NUCLEAR

March 4, 1985

Mr. Harold R. Denton, Director
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

KMLNRC 85-071
Re: Docket No. STN 50-482
Ref: KMLNRC 85-070, dated 3/1/85: Same Subject
Subj: Technical Specifications

Dear Mr. Denton:

The reference letter identified certain proposed Technical Specification issues related to operation of Wolf Creek Generating Station for which additional NRC staff review has been requested.

This letter confirms that, although the review of these issues is still requested, the proposed Technical Specifications do accurately reflect plant design, Final Safety Analysis Report, and the NRC's Safety Evaluation Report. In addition, it is confirmed that Wolf Creek can be safely operated in accordance with the proposed Technical Specifications.

This information is hereby incorporated into the Wolf Creek Generating Station, Unit No. 1 Operating License Application.

Yours very truly,
