

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

April 30, 2020

Mr. Bill Halliburton, Administrator
Cimarron Environmental Response Trust
c/o: Environmental Properties
Management, LLC.
9400 Ward Parkway
Kansas City, MO 64114

SUBJECT: ACCEPTANCE REVIEW OF LICENSE AMENDMENT REQUEST TO REDEFINE
LICENSED AREA OF THE CIMARRON FACILITY – SPECIAL NUCLEAR
MATERIAL LICENSE SNM-928

Dear Mr. Halliburton:

The U.S. Nuclear Regulatory Commission (NRC) staff received Environmental Properties Management's (EPM) November 22, 2019, request to amend special nuclear materials license SNM-928 to redefine the licensed area of the Cimarron site near Crescent, Oklahoma (Agency wide Documents Access Management System (ADAMS) Accession No. ML19330E146). At the NRC staff's request, EPM provided supplemental information by letters dated February 24, 2020 (ADAMS Accession No. ML20057F594), and March 24, 2020 (ADAMS Accession No. ML20087H742). The NRC staff has completed its administrative review and accepts the license amendment request for detailed technical review.

The NRC staff has prepared a schedule for review of this amendment request. The schedule shown below is based on several assumptions:

- There is no hearing on the amendment request.
- Timely resolution of any issues or concerns raised during consultations with other Federal, State, tribal, and local agencies, such as those required by Section 7 of the Endangered Species Act of 1973 and Section 106 of the National Historic Preservation Act of 1966, including any issues that could delay completion of the cultural resources survey.
- The number and complexity of comments provided by the State of Oklahoma does not require more time and effort than anticipated for resolution.
- No lapse in appropriations for the NRC or other cooperating or consulting agencies.
- EPM provides timely and high-quality responses to the NRC staff requests for additional information (RAIs).
- EPM remains grandfathered under the Site Decommissioning Management Plan criteria.
- There are no major modifications to the amendment request.

The schedule for the NRC staff review is as follows:

NRC Milestones	Projected Completion date
Issue safety review request for additional information	9/25/2020
Issue environmental review request for additional information	10/27/2020
Finalize Environmental Assessment and Finding of No Significant Impact.	8/2/2021
Finalize Safety Evaluation Report	11/16/2021
Issue Amended License	11/23/2021

The NRC anticipates EPM will commit to provide the necessary information to the NRC in accordance with this schedule, which will allow the NRC staff to complete its safety and environmental reviews by November 16, 2021, and issue the amended license by November 23, 2021. Specifically, the assumption is that EPM will adequately respond to all Safety RAIs by November 24, 2020 and all Environmental RAIs by December 11, 2020.

In accordance with 10 CFR 2.390 of the NRC's "Agency Rules of Practice and Procedure," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records component of the NRC's ADAMS. ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

If you have any questions concerning this letter, please contact me at 301-415-6664 or via email at Kenneth.Kalman@nrc.gov.

Sincerely,

Kenneth Kalman, Project Manager
 Materials Decommissioning Branch
 Division of Decommissioning, Uranium Recovery
 and Waste Programs
 Office of Nuclear Material Safety
 and Safeguards
