U. S. Nuclear Regulatory Commission  
Attention: Document Control Desk  
Washington, D.C. 20555

Gentlemen:

Subject: Three Mile Island Nuclear Generating Station, Unit 1 (TMI-1)  
Operating License No. DPR-50  
Docket No. 50-289  
Generic Letter 88-20, Supplement 4, "Individual Plant  
Examination for External Events" (IPEEE) - Schedule

In response to NRC letter dated June 29, 1992, GPUN has reassessed the schedule for completing the TMI-1 IPEEE. An overall evaluation of Integrated Schedule activities and assessment of the status of the IPE efforts for TMI-1 and DCNGS indicates that sufficient resources can be re-allocated to support completion and submittal of the TMI-1 IPEEE by December 20, 1994. This submittal will include all portions of the IPEEE effort. Accordingly, the TMI-1 Integrated Schedule has been revised to support expedited completion of the IPEEE. This change will be reflected in the next update of the Integrated Schedule.

Sincerely,

T. G. Broughton  
Vice President and Director, TMI-1
