South Carolina Electric and Gas Company
ATTN: Mr. O. W. Dixon, Jr.
Vice President, Nuclear Operations
P. O. Box 764
Columbia, SC 29218

Dear Mr. Dixon:

SUBJECT: PERFORMANCE OF DUTIES

On November 16, 1984, two (2) employees of Georgia Power Company were issued senior operator licenses for the Summer Nuclear Plant, Docket Number 50-395 (see enclosure). These licenses are subject to the provisions of Title 10 of the Code of Federal Regulations, Chapter 1, Part 55, Section 55.31, with the same force and effect as is fully set therein.

These individuals were examined and licensed by the NRC even though they had less nuclear power plant experience than normally required for applicants at operating facilities. The hot eligibility experience criteria were waived since each applicant met the cold eligibility criteria for a precritical facility such as Vogtle, had related experience, and completed a performance based INPO accredited training program using a plant-referenced simulator.

The above individuals are fully qualified to perform the duties of senior reactor operators at Summer Nuclear Station with the exception that they should not be used as Shift Supervisors. In your letter to me dated October 19, 1984, you stated that these individuals would not serve as Shift Supervisors. If your understanding of this matter is different, please inform this office promptly.

Sincerely,

(Original signed by FCantrell Jr.)

David M. Verrelli, Chief
Reactor Projects Branch 1
Division of Reactor Projects
