Gentlemen:

SUBJECT: CONFIRMATION OF ACTION - DOCKET NO. 50-302

This letter refers to the telephone conversation on January 21, 1985, between Mr. H. C. Dance of this office and Mr. P. F. McKee, Plant Manager, Crystal River Nuclear Plant, concerning the results of an NRC audit conducted at Crystal River during the week of January 13, 1985. During this audit an NRC inspector determined that a licensed Senior Reactor Operator, identified by license number on the enclosure, had failed the facility's annual requalification make-up examination administered on April 4, 1984.

Based upon the matters discussed, it is our understanding that you have taken and/or will take the following actions:

The senior reactor operator who failed the facility's annual requalification examination was prohibited from performing duties requiring a Senior Reactor Operator's license effective January 18, 1985. He will not be returned to licensed duties until he has satisfactorily completed an accelerated requalification program and passed an examination approved by the NRC.

If your understanding of our discussion is different from that stated above, please inform this office promptly.

Sincerely,

(Original signed by JPStohr)
