

Docket No. 50-382

JAN 24 1985

Louisiana Power & Light Company
ATTN: Mr. R. S. Leddick
Vice President, Nuclear Operations
142 Delaronde Street
New Orleans, Louisiana 70174

Gentlemen:

As you are aware, 10 CFR 170 of the Commission's regulations for license and inspection fees was revised effective June 20, 1984. Section 170.12(b) of the revised rule provides that for applications for permits, licenses, facility reference design approvals, and special projects which have been on file with the Commission for review for six months or longer, the first bill for accumulated review costs would be sent to the applicant at the time the rule becomes effective and thereafter at six-month intervals or when the review is completed, whichever is earlier. The first bill for the operating license (OL) review will include applicable professional staff review time expended through June 23, 1984, and contractual support services expended to May 31, 1984. Subsequent bills covering six-month reviews will be issued approximately ninety days after the end of each six-month period which closes in December and June of each year.

Consistent with the requirements of 10 CFR 170.12(b), we have completed the cost analysis for the Waterford 3 OL application review for the period specified above. The cost through that period is \$4,100,044. The cost of the OL review through June 23, 1984 exceeds the maximum fee of \$3,077,400 that may be assessed in accordance with 10 CFR 170.21 (Footnote 2). Accordingly, the Office of Resource Management has been notified to bill your Company for \$3,077,400. Since your Company received an operating license (5% power) on December 18, 1984, \$3,077,400 is the total that may be assessed for the OL review through issuance of the 100% operating license. When making payment, please make reference to the invoice number on your bill. For your information, applications for license amendments and other approvals are subject to fees in accordance with the provisions of 10 CFR 170.12(c) and 170.21.
