

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON D. C. 20555

September 9, 1992

Docket Nos. 59-445  
and 50-446

Mr. William J. Cahill, Jr.  
Group Vice President, Nuclear  
TU Electric  
400 North Olive Street, L.3. 81  
Dallas, Texas 75201

Dear Mr. Cahill:

SUBJECT: FINAL DRAFT VERSION OF COMANCHE PEAK UNITS 1 AND 2 COMBINED  
TECHNICAL SPECIFICATIONS (TAC NO. M81963)

A meeting was held on August 10-11, 1992, to discuss the combined unit Technical Specifications (TS) to be issued upon the NRC approval of a low power license for Comanche Peak Steam Electric Station Unit 2. The NRC staff had previously sent TU Electric a Proof and Review version of the TS (letter dated July 1, 1992).

At the meeting, slight modifications to several TS were discussed and finalized. Of the two open items from the previous meeting on the combined TS, the service water technical specification was finalized; however, additional discussion is necessary regarding the technical requirements manual section on feedwater isolation valve operability.

Enclosed is a copy of the Final Draft version of the Comanche Peak Units 1 and 2 Combined Technical Specifications for your review and certification. The TS to be issued upon NRC approval of a low power license for Unit 2 will be identical to this final draft version unless changes are requested and approved by the NRC. Any proposed changes to these final draft TS should be requested in writing, with corresponding justifications provided.

*DFO*

P PDR

You are requested to review these technical specifications and certify that this Final Draft version accurately reflects the as-built plant (Units 1 and 2) and is consistent with the Final Safety Analysis Report. Your written certification is requested by November 2, 1992.

Sincerely,

Original Signed By

Brian E. Holian, Senior Project Manager  
Project Directorate IV-2  
Division of Reactor Projects III/IV/V  
Office of Nuclear Reactor Regulation
