

VIRGINIA POWER

September 9, 1992

Mr. Gregory L. Clayton
Director - Region IV
Virginia Department of Air Pollution Control
Suite B
300 Central Road
Fredericksburg, Virginia 22401

Dear Mr. Clayton:

This letter is in response to a telephone conversation between Eva Mann of Virginia Power and Mr. Ward Butler, Department of Air Pollution Control (DAPC) Inspector concerning your letter dated August 13, 1992. They discussed the method of compliance with the request of "identifying a number of dates for training" in fire extinguisher use, which was stated in the letter. In order to maintain consistency between the DAPC Regional offices it was agreed (subject to your approval) to follow the guidance of DAPC Region V June 15, 1992 letter concerning the fire training notifications at Surry Power Station (see attached).

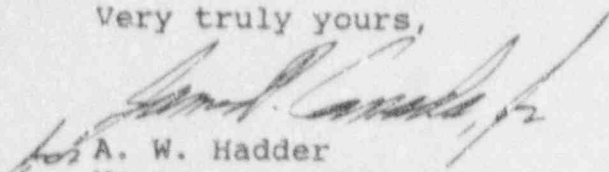

Under the proposed procedure, North Anna Power Station will need to maintain an internal record available for review by the DAPC, for a minimum of 12 months from the date of burn. Each actual burn conducted will have the following information recorded:

- Location of training site
- Date and number of hours training was conducted
- Type and amount of fuel burned
- Name of primary instructor

In maintaining these records it is our understanding that the intent of the August 13, 1992 letter from your office and the requirement of notification of open burning for training purposes will be met. We would appreciate your concurrence.

If there are any questions please contact Eva Mann 273-3016.

Very truly yours,

A. W. Hadder
Manager
Air Quality

REGIONAL DIRECTOR

June 15, 1992

Mr. A.W. Hadder
Virginia Power
Innsbrook Technical Center
Glen Allen, VA 23060

Dear Mr. Hadder:

The Department received your letter dated May 28, 1992 in reference to Virginia Power's "Fire Watch Training Program" to be conducted at various Virginia Power locations. The Region 5 office has no objection to Virginia Power conducting this training as specified in the March 28, 1992 letter. Furthermore, provided this training is conducted as identified in the above letter, there is no requirement to notify this office of dates this burning is scheduled or conducted.

The Department would request Virginia Power keep an internal record available for Department review, for a minimum of 12 months from date of burn, the following information on each burn actually conducted:

- Location of training site
- Date and number of hours training was conducted
- Type and amount of fuel burned
- Name of primary instructor

The reason for having the above records available, is to help clarify any complaints or public concerns the Department may receive from citizens who may not realize the reason for this open burning. If you have any questions, please do not hesitate to let me know.

Sincerely,

Vernon C. Williams

Vernon C. Williams
Acting Director, Region 5
