FEL 8/11/81

In the Matter of
Detroit Edison Company
(Enrico Fermi Atomic Power Plant, Unit 2)
Docket No. 50-341

Dear Mr. Cosgrove:

The Atomic Safety and Licensing Board has scheduled a hearing in the proceeding concerning issuance of an operating license for the Enrico Fermi Atomic Power Plant, Unit 2 under construction by Detroit Edison Company near Monroe, Michigan. The hearing will begin December 1, 1981. One of the three contentions to be litigated concerns evacuation of the Stony Pointe residential area on the shore of Lake Erie, near the Fermi-2 plant. A copy of the contention is attached for your information.

needed?

The NRC will provide witnesses to address the available evacuation routes and time estimates for evacuation, and appropriate protective actions. It will be necessary for you to provide a FEMA witness to address the adequacy of local emergency notification systems and methods of evacuation of the Stony Pointe area over the Pointe Aux Peaux Road which parallels the plant site boundary. It is my understanding that the information concerning these matters has previously been provided to FEMA.

FEMA area

The Board issued an order on August 4, 1981 directing that pre-filed written testimony for this hearing be served by November 9, 1981. Therefore, I am asking for your assistance in arranging for a FEMA witness and written testimony on this narrow issue as soon as possible. I would very much appreciate having draft testimony on this matter in my hands by October 1, 1981.

For clarification, the following information is provided:
A FEMA witness and written testimony is required for hearing concerning local emergency notification systems and means of

evacuation of residents of the Story Pointe area over the
Pointe Aux Peaux Road.

Dates: Draft Testimony due: October 1, 1981
Prefiled testimony due: November 9, 1981
Hearing: December 1-4, 1981. (Place of
hearing not yet determined).

If you will, I would also appreciate notification of the FEMA member selected to testify at hearing on this limited matter at your earliest convenience. The person selected may contact the NRC Staff reviewer, Paul Psomas by telephone at 492-9688.

Thank you for your cooperation on this matter. If I can be of assistance, please contact me at the telephone number indicated below.

Sincerely,

Colleen P. Woodhead
Counsel for NRC Staff

FERMI-2

EMERGENCY PLAN CONTENTION

CONTENTION 8: The Intervenor CEE is concerned over whether there is a feasible escape route for the residents of the Stony Pointe area which is adjacent to the Fermi-2 site. The only road leading to and from the area, Pointe Aux Peaux Rd., lies very close to the reactor site. In case of accident the residents would have to travel towards the accident before they could move away from it.
