TECHNICAL SPECIFICATION CHANGE
MAIN STEAM SAFETY VALVES - TSP 880018-3

South Carolina Electric & Gas Company (SCE&G) is submitting this letter in response to the July 6, 1992, meeting held to discuss the status of the Technical Specification Change Request (TSCR) for an increase in Main Steam Safety Valve (MSSV) lift setpoint tolerance from 1% to 3%. The meeting was held at One White Flint North, in Rockville, Maryland. In attendance were: David Haile and Lou Cartin (SCE&G); Paul Roberts (Westinghouse); and George Wunder, Harvey Ableson, and Mark Caruso (NRC).

As a result of the meeting, a request was made of SCE&G to provide additional information to facilitate the review of its submittal. The attached proprietary and non-proprietary letters from Westinghouse supply the requested information.

Also, a request was made of SCE&G to commit to resetting the MSSVs to within $\pm 1\%$ of setpoint if the as found lift pressure is discovered to be greater than $\pm 3\%$ during surveillance testing. SCE&G agrees with this commitment and hereby requests that this letter be accepted as a supplement to the original TSCR submittal.

I declare that the statements and matters set forth herein are true and correct to the best of my knowledge, information, and belief.

Should you have any questions concerning this issue, please call Mr. David C. Haile at (803) 345-4322 at your convenience.

Very truly yours,

John L. Skolds

Proprietary Information Notice

Transmitted herewith are proprietary and/or non-proprietary versions of documents furnished to the NRC in connection with requests for generic and/or plant-specific review and approval.

In order to conform to the requirements of 10 CFR 2.790 of the Commission's regulations concerning the protection of proprietary information so submitted to the NRC, the information which is proprietary in the proprietary versions is contained within brackets, and where the proprietary information has been deleted in the non-proprietary versions, only the brackets remain (the information that was contained within the brackets in the proprietary versions having been deleted). The justification for claiming the information so designated as proprietary is indicated in both versions by means of lower case letters (a) through (g) contained within parentheses located as a superscript immediately following the brackets enclosing each item of information being identified as proprietary or in the margin opposite such information. These lower case letters refer to the types of information Westinghouse customarily holds in confidence identified in Sections (4)(ii)(a) through (4)(ii)(g) of the affidavit accompanying this transmittal pursuant to 10 CFR 2.790(b)(1).

Copyright Notice

The reports transmitted herewith each bear a Westinghouse copyright notice. The NRC is permitted to make the number of copies of the information contained in these reports which are necessary for its internal use in connection with generic and plant-specific reviews and approvals as well as the issuance, denial, amendment, transfer, renewal, modification, suspension, revocation, or violation of a license, permit, order, or regulation subject to the requirements of 10 CFR 2.790 regarding restrictions on public disclosure to the extent such information has been identified as proprietary by Westinghouse, copyright protection notwithstanding. With respect to the non-proprietary versions of these reports, the NRC is permitted to make the number of copies beyond those necessary for its internal use which are necessary in order to have one copy available for public viewing in the appropriate docket files in the public document room in Washington, DC and in local public document rooms as may be required by NRC regulations if the number of copies submitted is insufficient for this purpose. The NRC is not authorized to make copies for the personal use of members of the public who make use of the NRC public document rooms. Copies made by the NRC must include the copyright notice in all instances and the proprietary notice if the original was identified as proprietary.
