MAY 26 1983

Dr. S. T. Algermissen
U. S. Geological Survey
P. O. Box 25046, M. S. 966
Denver, Colorado 80225

Dear Ted:

We plan to have a meeting in Bethesda, June 23, 1983, 9:00 a.m.-3:00 p.m., Room P-118 to discuss with the WNP-3 applicant the questions which were submitted. We expect the USGS staff who participated in drafting the questions (D. Perkins, T. Heaton, R. Tabor and R. Wells) as well as Bob Morris and/or you to attend.

The purpose of the meeting is to give guidance to the WNP-3 applicant which will help it in answering the questions. It will help expedite the meeting if the author of each question is prepared to make a short presentation: explaining why the question was asked, providing additional background to help the applicant understand the question and some guidance as to what type of additional information the applicant can supply that would most likely lead to a satisfactory answer to the question.

If you have any questions please contact Steve Brocoum (FTS 492-4414) or me (FTS 492-8063).

Sincerely,

Robert E. Jackson, Chief
Geosciences Branch, DE
