Subject: Docket Nos. 50-361 and 50-362
Monthly Operating Reports for August 1992
San Onofre Nuclear Generating Station, Units 2 and 3

Technical Specification 6.9.1.10 to Facility Operating Licenses NPF-10 and NPF-15 for the San Onofre Nuclear Generating Station, Units 2 and 3, respectively, requires SCE provide a Monthly Operating Report for each Unit, which includes: routine operating statistics and shutdown experience; all challenges to safety valves; any changes to the Offsite Dose Calculation Manual (ODCM); and any major changes to the radioactive waste treatment system. All covered activities are reported monthly, except for ODCM changes, which are reported within 90 days from the time the changes were made effective.

This letter transmits the August 1992 Monthly Operating Reports for Units 2 and 3, respectively. There were no challenges to safety valves, no changes to the ODCM, and no major changes to the Units 2 and 3 radioactive waste treatment systems during the reporting period.

Attachment A to the enclosure provides revised Unit 3 "Unit Shutdowns and Power Reductions" sheets for the April, May, and July 1992 Monthly Operating Reports to correct the number of unit shutdowns that occurred in April 1992 and to revise accordingly, the sequential shutdown number for subsequent unit shutdowns. Attachment B to the enclosure provides a revised Unit 3 "Summary of Operating Experience for the Month" sheet for the April 1992 Monthly Operating Report to correct a typographical error.

If you require any additional information, please let me know.

Very truly yours,

Walter C. Marsh
