Re: United Nuclear Site

Dear Mr. Hall:

The United States Environmental Protection Agency (EPA) has received the draft amendment to the Source Material License SUA-1475 for the expansion of the Enhanced Evaporation System at the subject facility. The amendment is for increasing the evaporation capacity of the system through the installation of additional spray guns in the South Cell.

EPA concurs with the license modifications as proposed by your Agency. The conditions stated in the license modification are consistent with the Memorandum of Understanding (MOU) of August 1988 between EPA Region 6 and the Nuclear Regulatory Commission (NRC) Region 4.

If you have any questions, please contact me at (214) 655-6730.

Sincerely,

Shawn Ghose, RPM
