Attention: Mr. John F. Stolz
Operating Reactor Branch No. 4
Division of Operating Reactors
United States Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Stolz:

On November 24, 1982 (Serial No. 878) Toledo Edison submitted a response for the Technical Specifications for Snubber Surveillance at Davis-Besse Nuclear Power Station Unit 1. In the letter we committed to provide the revised Technical Specifications for Snubbers by June 30, 1983. Due to unforeseen extended internal review and support for the upcoming *refueling* outage we will be unable to meet our date of June 30, 1983. We plan to submit the revised Technical Specifications by August 1, 1983.

Very truly yours,
