MEMORANDUM FOR: Richard W. Starostecki, Director
Division of Project and Resident Programs
NRC Region I

FROM: Karl V. Seyfrit, Chief
Reactor Operations Analysis Branch, AEOD

SUBJECT: EXTENSION OF TMI-1 SALP REVIEW

In accordance with your February 29, 1984 memorandum, AEOD has performed a supplementary LER review for TMI-1. The review covered 13 LERs which were written about events which occurred between October 1, 1983 and January 31, 1984. The caliber of the LERs which were reviewed for this supplemental period was essentially the same as that of the original period (October 1, 1982 to September 30, 1983). Consequently, we have no significant additions to our original TMI-1 LER review (memorandum from K. V. Seyfrit to R. W. Starostecki, "Evaluation of LERs for Three Mile Island Nuclear Station, Unit 1, for the Period from October 1, 1982 to September 30, 1983 - AEOD Input to SALP Review," dated November 2, 1983).

Please contact Hal Ornstein at FTS 492-4439 if you have any questions regarding this matter.
