Note to John Hopkins

SUBJECT: SUMMER 1 HOOP TENDON VALUES (OELD # 837 407)

This package is not bad but you should give a little more information on the nature of the error and the nature of the change - describe that a little and give some context to show that the change isn't extensive. Right now you don't tell them enough about the error and the nature of the changes resulting from the error. Its hard to understand what exactly the nature of the change is resulting from the error you're talking about. Prepare some words and discuss them with Steve Goldberg by phone or whatever way he want to - square away with Steve some additional language for this. I don't see the need for it to come back to me.
