Note to Carl Stahl

SUBJECT: SEQUOYAH 1 (OELD # 840 361)

This package is okay but before you act on it to issue the amendment, double-check with AEOD to make sure they agree that this is an appropriate thing to do with respect to the LER's and to make sure that they agree that this is a reasonable way to describe the situation. That should be done before you take action on issuing the amendment. You can issue this notice as is right now if that's the way the licensee described it when they asked for it - that's the way you notice it. My comments relate to what you're going to do before you actually issue it.
