Dear Mr. Hall:

This is a follow up to a conversation you had with Louise Barton on August 13, 1992, in regard to the discharge from an in-plant sump.

The sump accumulates ground water and discharges from other in plant sumps on the Unit 2 (not operating) portion of the plant. It currently discharges directly to the storm drain system.

This letter is notification that the discharge will be routed through an oil separator prior to entry into the storm drain system.

The attached drawings show the location of the sump on a general plant layout as well as details of the connection. The new routing will still discharge to the same storm drain system, which was identified in the Perry Plant Stormwater Discharge Permit Application as Outfall 1.

Please contact Louise if you have questions or need more information. She can be reached at (216) 259-3737 ext. 5512.

Sincerely,

Michael D. Lyster
