SUBJECT: SURRY LICENSE AMENDMENT ON ORGANIZATIONAL CHANGES

OELD has been asked to concur in a license amendment implementing management and organizational changes for Surry. Specific license changes were requested in Licensee letters of March 16, June 28, August 3, and August 9, 1982 and additional license changes were requested in Licensee letters of June 30 and October 27, 1983. Notice of the proposed amendments requested in the four 1982 letter applications was published in the Federal Register on July 20, 1983. However, that notice apparently did not describe the June 30, 1983 letter application and clearly could not have covered the license changes which are the subject of the October 27, 1983 letter application. Since the June 30 and October 27, 1983 organizational changes were not noticed, the license amendment involving those changes cannot now be issued (absent a finding that a valid emergency exists requiring issuance without prior notice and a final finding of NSHC). For this reason, I cannot concur in this package.

In view of the lack of prior notice of the June 30 and October 27, 1983 change applications (and assuming that no emergency exists), there are two possible options:

- (1) You could modify this package by removing the changes which were requested in the June 30 and October 27, 1983 letters, issue the modified package and license amendments which already were noticed in the Federal Register, notice the changes which were requested in the 1983 letters and issue those changes in the future after their corresponding notice period has expired; or
- (2) You could hold on to this package, issue an additional Federal Register notice of the 1983 change applications, and then issue this package and all amendments after the additional notice period expires.
