Dallas, Texas 75201

Gentlemen:

SUBJECT: NRC INSPECTION REPORT 50-445/92-32; 50-446/92-32
(NOTICE OF VIOLATION)

This refers to the inspection conducted by Mr. W. M. McNeill of this office on August 17-20, 1992. The inspection included a review of activities authorized for your Comanche Peak Steam Electric Station, Units 1 and 2, facility. At the conclusion of the inspection, the findings were discussed with you and those members of your staff identified in the enclosed report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observation of activities in progress.

Based on the results of this inspection, certain licensed activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice of Violation (Notice). This violation represents a failure to maintain appropriate administrative control of startup operating instructions and test procedures. Although this violation would normally not be cited as provided in Section VII of the NRC Enforcement Policy, a Notice is being issued because the number of examples indicates that the problem is not isolated in nature.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

A. Bill Beach, Director
Division of Reactor Projects
