

November 21, 1983

Note to Helen Nicolaras

SUBJECT: MONTICELLO - TEMPERATURE SWITCHES IN MAIN STEAMLINE TUNNEL
(OELD # 839 491)

This package is okay but you have to watch out on these notices the next time that the notice of proposed action left out the reference to the February 1983 supplement to the amendment. If there was any substance to the February 1983 amendment to the application, it could be argued that the original notice was inadequate. So you have to watch these things.
