SUMMARY

Scope:

This routine, unannounced inspection was conducted in the area of the Physical Security Program for Power Reactors. Specifically; audit, barriers, alarms, access controls, power supply, alarm stations, communications and training were inspected. Additionally, the licensee's corrective actions to a prior violation (91-17-01) were reviewed.

Results:

In the area inspected, one violation was identified, relative to changing keys/cores upon the unfavorable termination of an individual (92-24-01). The licensee's audit and training programs appear to be strong. Recent upgrades and improvements have enhanced barriers, alarms, alarm stations such that 91-17-01 will be closed.
