Dear Mr. Lyster:

This refers to the special electrical distribution system followup inspection conducted by Mr. Rolf A. Westberg and others of this office on August 17-21, 1992. During this inspection, we evaluated activities at the Perry Nuclear Power Plant, Units 1 and 2, authorized by NRC Operating License No. NPF-48 and Construction Permit No. CPPR-149. We discussed our inspection findings with Mr. Edward M. Root and others of your staff at the conclusion of the inspection on August 21, 1992.

The enclosed copy of our inspection report identifies the areas examined during the inspection. The inspection assessed your actions on previously identified inspection items from the electrical distribution system functional inspection (EDSFI) conducted in May 1991. The inspection consisted of a review of open inspection findings, representative records, and walkdowns of selected portions of installed equipment.

No violations of NRC requirements were identified during the course of this inspection.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC Public Document Room.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

Original Signed by Mark A. Ring
