Dear Mr. Gannuch:

Thank you very much for letting me hear from you concerning the condition of Waterford III .

I will certainly be pleased to look into this matter for you, and have taken the liberty of contacting the appropriate officials here in Washington to request a report. I will be back in touch with you just as soon as I have any additional information.

I appreciate your bringing this to my attention, and send every good wish.

Sincerely,

J. Bennett Johnston
United States Senator

OFFICE OF SECRETARY
DOCKETING & SERVICE
BRANCH

The Honorable Bennet Johnston
Senate Office Building
Washington, D.C. 20510

The Honorable Bennet Johnston:

As a concerned citizen, I would like to know what is being done or what can be done about the present condition of Waterford 3. I have been worried about the needless use of nuclear power plants as an energy source. So many other safer energy sources such as solar energy and geothermal energy exist that I'm not sure that nuclear power is worth the risk. This nuclear power plant endangers my life along with many others, and now it is brought to my attention that Waterford 3 has been rated by a Ralph Nader organization as being the worst-managed power plant now under construction. I think that something ought to be done about this situation. I feel that if anyone could take substantial action against the conditions of Waterford 3 it would be a senator.

I would like to know if any actions could be taken

and if they are being taken. I know that many
others share my concern

Sincerely,

Darren Gannuch
