MEMORANDUM FOR: R. Capra, Technical Assistant
 Division of Systems Integration

FROM: F. Rosa, Chief, Instrumentation & Control Systems Branch
 Division of Systems Integration

SUBJECT: RESAR SP/90 ACCEPTANCE REVIEW

Reference: 1. Westinghouse Letter (HS-EPR-2842), dated October 24,
 1983, E. P. Rahe, Jr. to H. R. Denton with
 Enclosure 2 - Westinghouse APWR Nuclear Power Block
 Definition
 Enclosure 3 - Licensing Program, PDA Module Schedule
 Enclosure 4 - APWR SAR INFO

In response to the memo from Eisenhut to Mattson, Vollmer, Speis and Thompson, dated November 7, 1983, the Instrumentation and Control Systems Branch has conducted an acceptance review of Westinghouse's application. We have reviewed the document (Reference 1) that has been distributed to us. This document basically consists of an outline of the nuclear power system, its licensing program and Preliminary Design Approach module schedules. Our findings are as follows:

1. The review area of our branch will be in module numbers 1 and 9.
2. The submittal dates of these modules are reasonable and acceptable.
3. No significant deficiencies have been found.
