Note to D. DiIanni

SUBJECT: PRAIRIE ISLAND 1 - REACTOR COOLANT SYSTEM VENTS (OELD # 842 313)

Dom, the package is okay with the corrections that Mike Wilcove has made in it; however, since we are signing off so far in advance, we're a little concerned. Its okay provided (1) there are no changes at all in the package, (2) there are no comments from the public or from the State, and (3) that the package is to be held until after the last date for filing petitions for leave to intervene or comments. If any of those things happen, come back to ELD before this goes out.
