MEMORANDUM FOR: Darrell G. Eisenhut, Director
Division of Licensing

FROM: Hugh L. Thompson, Jr., Director
Division of Human Factors Safety

SUBJECT: RESAR SP/90 PDA ACCEPTANCE REVIEW

We have reviewed the RESAR SP/90 PDA application submitted by Westinghouse letter NS-EPR-2482, dated October 24, 1983, to Harold Denton from E. P. Rabe, Jr. We find the Licensing Program PDA Module Schedule submittal dates proposed in the application acceptable to DHFS. However, the application appears to have conflicting information relative to the initial test program. Enclosure 3 indicates that the initial test program will be described in Module 14 which is to be submitted October 1984. Enclosure 4 indicates that FSAR Section 14 information (i.e., initial test program) will be submitted in Module 17 which is scheduled for February 1985. In order that we may effectively schedule our work, the applicant should clarify when it will submit the initial test program description.

We plan to perform a cursory review of each module submitted to; (1) help us better understand plant systems, (2) understand future procedures and test requirements, and (3) identify any information that may impact or be significant to the modules which we will have responsibility for reviewing.

DHFS plans to perform a detailed review of Module 15, "ACR/Human Factors" (submittal date November 1984), portions of Module 17, "Completed Application" (submittal date February 1985), and Module 14 if it includes the initial test program description.

Your memorandum states that NRC, intends to propose a draft SER input for each module within three months after its receipt. Please note that our ability to provide useful input within three months will depend on our getting all modules promptly upon receipt by NRC and on the applicants' responsiveness to any necessary requests for information.
