

March 19, 1984

Note to Marshall Grotenhuis

SUBJECT: BRUNSWICK 1 - TIME DELAY RELAY (OELD # 843 256)

Marshall, the amendment application appear to have been amended three times after the date of the application which we gave notice of. We noticed only the application dated March 16, 1982. It strikes us that this package should be renoticed to cover the subsequent supplements. At the minimum, you should describe the substance of each of the three subsequent supplements to the 3/16/82 amendment request. Discuss them and describe what they did in some detail so that it can be ascertained whether or not those supplements in fact changed the character of the amendment so as to adversely affect the notice previously provided in the Federal Register. Looking at some of the things on the incoming, it looks to us like they do fairly substantially affect the substance of the amendment so that you're better off renoticing it.
