MEMORANDUM FOR: Gus Lainas, Assistant Director for Operating Reactors  
Division of Licensing

FROM: R. Wayne Houston, Assistant Director for Reactor Safety  
Division of Systems Integration

SUBJECT: PROPOSED TECHNICAL SPECIFICATION REQUEST NO. 35

Plant Name: Beaver Valley, Unit 1  
Docket No.: 50-334  
Licensing Status: OR  
TAC No.: 10386  
Responsible Branch: ORB #1  
Project Manager: P. Tam  
Review Branch: ICSB  
Review Status: Incomplete

By letter dated October 27, 1978, Duquesne Light proposed Technical Specification changes for plant operation with a loop out of service. ICSB has reviewed the proposed changes and has a number of comments which will require resolution before this action can be completed.

As with recent proposed changes, it is recommended that the enclosed set of ICSB's comments be used as an agenda for further discussions with the licensee. Since many of the recommendations noted in the enclosure relate to the Standard Technical Specification format for operation with a loop out of service, SSPB will be requested to participate in the resolution of the proposed changes.
