Engineering Division

Mr. Gary Staley  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Dear Mr. Staley:

This is in response to our telephone conversation concerning the Savannah District's Dam Safety Plan. Furnished, under separate cover, are copies of the Dam Safety Plan and the Dam Failure Inundation Maps for Hartwell, Clarks Hill, and Richard B. Russell Lakes.

Our plan addresses emergencies related to above normal reservoir water levels and/or rapid release of large volumes of water past the dam. It covers identification of impending or existing emergencies, notification of other parties concerning impending or existing emergencies, and emergency operations and repairs. Areas potentially affected by emergencies are identified for the cases of Spillway Design Flood without dam failure; Spillway Design Flood with dam failure; and dam failure at top of flood control pool and maximum power pool.

If we can be of any further assistance, please contact Mrs. Joel James at 912-944-5513.

Sincerely,

  
Randall C. Miller  
Chief, Hydrology and  
Hydraulics Branch
