## SUMMARY

### Scope:

This routine, unannounced inspection was conducted in the area of the Physical Security Program for Power Reactors. Specifically, the inspector reviewed Plans, Audits, Barriers, Alarms, Alarm Stations, Communication, Testing, Compensatory Measures, and Power Supplies.

### Results:

In the area inspected, violations or deviations were not identified.

The licensee continues to have strong support of its security programs, audits were a strength, as was the maintenance of security equipment. Barriers, detectors, alarm stations, and communications were adequate. Power supplies are tested and reliable. The licensee was encouraged to complete its extensive review of the commitments found in the security plan to verify the validity of each commitment (see Paragraph 2.a for details).
