Gentlemen:

This refers to the inspection conducted by Mr. R. Baer of this office during the period December 11 and 12, 1984, of activities authorized by NRC Operating Licenses DPR-51 and NPF-6 for Arkansas Nuclear One, Units 1 and 2, and to the discussion of our findings with Mr. J. M. Levine and other members of your staff at the conclusion of the inspection.

Areas examined during the inspection included ingredients of the radiation protection program during routine and refueling operations and allegations regarding the lack of proper radiation protection controls and improper use of respiratory protection equipment. Within these areas, the inspection consisted of selective examination of procedures and representative records, interviews with personnel, and observations by the inspector. These findings are documented in the enclosed inspection report.

Within the scope of the inspection, no violations or deviations were identified.

Should you have any questions concerning this inspection, we will be pleased to discuss them with you.

Sincerely,

"Original Signed by:"

D. R. Hunter, Chief
Reactor Project Branch 2
