Mr. Robert D. Martin, Regional Administrator  
U. S. Nuclear Regulatory Commission  
Region IV, Office of Inspection and Enforcement  
611 Ryan Plaza Drive, Suite 1000  
Arlington, Texas 76011

Dear Mr. Martin:

**RIVER BEND STATION UNIT I  
DOCKET NO. 50-458  
FINAL REPORT/DR-208**

Gulf States Utilities Company (GSU) has completed its evaluation of DR-208 concerning a pipe support clamp supplied by Bergen Paterson that was installed with a surface-to-surface C dimension of 1 inch instead of 7/8 inch as required by the vendor. Since the as-installed clamp would not have compromised the load capacity of the part, GSU concludes this condition is not reportable under 10CFR50.55(e). However, Nonconformance and Disposition Report No. 5835 was issued to install two 1/16-inch thick washers on the part.

Sincerely,

*L. A. England*
