

JAN 28 1985

Docket No. 50-341

The Detroit Edison Company  
ATTN: Wayne H. Jens  
Vice President  
Nuclear Operations  
6400 North Dixie Highway  
Newport, MI 48166

Gentlemen:

This refers to the special safety inspection conducted by Messrs. R. Mendez, Z. Falevits, K. Tani, and A. S. Gautam of this office on December 19-20, 1984, January 3-5 and 10-12, 1985, of activities at Enrico Fermi Nuclear Station, Unit 2, authorized by NRC Construction Permit No. CPPR-87 and to the discussion of our findings with Dr. W. H. Jens and Mr. W. R. Holland at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

During this inspection, certain of your activities appeared to be in non-compliance with NRC requirements, as specified in the enclosed Appendix. A written response is required.

Additionally, several other matters concerning the adequacy of your electrical as-built configuration and related design documents are identified in the enclosed report. These matters represent additional examples of items of noncompliance discussed in Inspection Reports Nos. 50-341/84-62, 84-57, 84-50, 84-45, 84-35 and 84-17. Further, these issues were discussed with you and members of your staff during meetings in the Region III office on December 5, 10, and 31, 1984. You have committed to take and are taking major corrective actions to address our concerns in this area. Pending completion of your effort and our review of your action, these issues have been characterized as unresolved items. These items need to be resolved satisfactorily prior to our recommending a low power license for your facility. Consequently, in your response to this letter please include the corrective action you are taking to resolve each of these items.

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosure(s) will be placed in the NRC Public Document Room unless you notify this office, by telephone, within ten days of the date of this letter and submit written application to withhold information contained therein within thirty days of the date of this letter. Such application must be consistent with the requirements of 2.790(b)(1). If we do not hear from you in this regard within the specified periods noted above, a copy of this letter, the enclosure(s), and your response to this letter will be placed in the Public Document Room.

The responses directed by this letter (and the accompanying Notice) are not subject to the clearance procedures of the Office of Management and Budget as required by the Paperwork Reduction Act of 1980, PL 96-511.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

*Original signed by R.L. Spessard*

R. L. Spessard, Director  
Division of Reactor Safety
