Dear Mr. Spence:

Subject: Staff Evaluation Findings Pertaining to Containment Isolation
Items for the Comanche Peak Steam Electric Station (Units 1

Enclosed are the staff's evaluation findings on the following containment isolation items, addressed in TUGCO letters to me dated August 19, 1983, August 20, 1983, December 16, 1983, April 4, 1984, August 20, 1984 and August 24, 1984, which we propose to document in a future Comanche Peak SER supplement:

1. The containment isolation provisions for sump recirculation lines;
2. Elimination of certain containment isolation valves from the Type C leak test program; and
3. Implementation of the Technical Specification permitted exemption from the requirement of Section III.D.2 (b)(ii) of Appendix J to 10 CFR 50, regarding airlock leak testing.

In addition, the staff has revised the SER to resolve an inconsistency which existed between the Technical Specification and the SER (see Section II.E.4.2 of the enclosure).

Each of the above listed items addressed in the enclosure have been found to be acceptable by the staff.

Sincerely,
